

NSF Funding Opportunities: Rethinking Undergraduate STEM Education

Workshop Presenter
JEFF FORBES
NSF Program Director

This workshop will provide an overview of the National Science Foundation and its funding programs - focusing primarily on programs from the Directorates for Computer & Information Science & Engineering (CISE) and Education & Human Resources (EHR).

The workshop will provide tips on how to write effective NSF grant proposals by explaining and exploring all aspects of the proposal review process. NSF is in the process of evaluating and rethinking its programs in support of science & engineering education both within EHR and the research directorates. A particular focus has been on initiatives that support undergraduate STEM education such as Improving Undergraduate STEM Education (IUSE) program.

The workshop will include a presentation by Dr. Forbes followed by a mock panel review session. Attendees are encouraged to ask questions throughout the workshop and provide feedback about the needs and challenges in undergraduate education.

Friday, March 14th, 2014
9 am to noon

William H. Hannon Library
Third Floor, Von der Ahe Suite

*Breakfast will be served.
