

The Opioid Epidemic & What We Can Do About it

Presented by Larry Toll, Ph.D.,
professor of biomedical science,
Charles E. Schmidt College of Medicine

1 – 2 p.m. EST
Thursday, May 21

ZOOM link: bit.ly/2VzQJD1

VIRTUAL RESEARCH IN ACTION

Over the past two decades, opioids – in the form of prescription painkillers, heroin and illicit fentanyl – have contributed to nearly 400,000 overdose deaths in the U.S.

Join Larry Toll, Ph.D., as he talks about the science of addiction and the research behind opioids, including:

- The body's response to opioids
- Opioids effects to a person's brain
- Potential less addictive pain treatments and medication
