
What's New for EERE Funding Opportunity eXCHANGE 3.21 Release

The EERE Funding Opportunity (eXCHANGE) Release 3.21 consists of several small changes throughout the system, including a new Research, Technology, and Economic Security (RTES) report, bug fixes, admin page updates, and enhanced authentication updates.

Specific Functionality

Research, Technology, and Economic Security (RTES) Report

A new **RTES Submission Report** will be created that enables Funding Opportunity Announcement (FOA) Managers with elevated access to pull RTES submission data needed for their review. This report will be available within the new **Admin Reports** section of eXCHANGE. The following user roles will have access to this report:

- FOA Manager – Elevated Access
- System Admin

Admin Page History

System Admins can now update a user's email upon request. Admins will have the ability to make this update on the **Admin Page**, which will also track various account updates as they are made. These changes will be tracked within the **Account History table** on the page.

Authentication Updates

Users will now be able to register using the enhanced login button.

New User Guide

A new user guide will be included in this release for External User Login.
